SUMMARY

- Platform-focused Software Engineer with **7+ years** of experience building scalable, production-grade systems.
- Bachelor's degree in Computer Science.
- Expertise in **Laravel, Yii2, and Next.js** (**TypeScript**) for backend and headless architectures.
- Strong background in cloud infrastructure across **AWS**, **GCP**, and **Azure.**
- Deep focus on clean architecture, **SOLID principles**, and proven **design patterns**.
- Experienced in performance optimization, including database tuning and caching strategies.
- Skilled in designing reliable, scalable systems for real-world production environments.
- Passionate about building platforms and developer tooling that scale teams, not just codebases.

PROFESSIONAL EXPERIENCE

Dec 2024 - Present **Staff Software Engineer | iSolution - Google Cloud & Google Maps Partner**

- Built a **Laravel-based** chatbot with **Azure SSO**, **webhook** integration, **Redis** caching, and **Docker containerization** for scalable deployment.
- Migrated **40+ domains** including all site content, email configurations, and **DNS records** with **zero downtime**.
- Developed a **Vercel-like** deployment platform in **Laravel** with **Git provider sign-ins**, repo listing, and dynamic Docker-based project cloning.
- Led the **SonarQube SaaS** platform by building a headless CMS with **Laravel + Filament.** Set up the **Next.js** environment with **TypeScript** and **Zustand**, and consistently supported the frontend developers with ongoing technical guidance throughout the entire development process.
- Automated full instance provisioning using **ArgoCD** and **kubectl**, returning production-ready environments upon subscription.
- Engineered a zero-touch CI/CD pipeline for **UnifyAi SaaS GKE** using **Terraform**, **Github Actions** and **Laravel**, with real-time **webhook** status monitoring in a **Filament CMS**.
- Designed and developed a fully functional **Laravel package** from scratch, adhering to **best practices** in **modular architecture**, testing, and versioning packaged for seamless integration and reusability across multiple projects.

May 2024 - Nov 2024 **Senior Full-Stack Engineer , Lexzur - Beirut Governorate, Lebanon**

- **Contributed** to the development and enhancement of Lexzur's legal technology platform.
- **Designed** and **developed** backend functionalities to support legal workflows, document handling, and system integrations.
- **Collaborated** closely with product managers and stakeholders to translate legal domain requirements into scalable technical solutions.
- **Improved** existing modules by refactoring code, enhancing performance, and ensuring maintainability across the platform.

Jun 2023 - May 2024 **Senior Full-Stack Developer - Platform , EndSpace Mena, Dbayeh**

- **Participated** in debugging, testing, and deploying updates to ensure platform stability and reliability.
- **Led and enhanced the performance** of **GraySync** system by optimizing MySQL queries, implementing caching, and reducing unnecessary joins.
- **Strengthened the security** by identifying and resolving critical vulnerabilities.
- **Refactored and streamlined** the codebase for improved efficiency and maintainability.
- **Modernized** the frontend by transitioning to **Next.js, Next Auth** with **TypeScript**, **Tailwind CSS, used Zustand** as a state management, **TanStack Query** while preserving the **Yii2** backend and APIs.

May 2021 – Jun 2023 **Full-Stack Developer, Codendot, Tripoli, Al Mina**

- Specialised in implementing **Automated facility management solutions** such as E-maintain (Pepsi Lebanon), Fibrex, Mitsulift (Mitsubishi Electric) using the **Yii2 PHP Framework, MySQL** including **Cron Jobs, AI integrations, Complex queries, Dashboard Analytics**.
- Built **Ecommerce** websites such as ALMawi, Zmerly, CedarRoots, OleNutrients, BestFor LB … using the **Magento Framework.**
- Developed **Mobile applications** such as Tree Treat, Keep Property, Pepsi Lebanon, Zakey Customer, Zakey Supplier… using **Cordova, Framework7, React Native, Expo, Firebase push notifications**.
- Deployed backend systems on **cPanel**, published mobile apps to both **Google Play** and **App Store.**

May 2019 - Apr 2021 **Software Developer (Odoo / ERP Systems), Tripoli - North Lebanon**

- Implemented and customized Odoo POS and ERP modules, adapting workflows to business requirements.
- Developed and configured inventory management logic, product categorization, and item code systems within Odoo.
- Extended Odoo POS functionality to improve sales operations, reporting accuracy, and cashier workflows.
- Provided technical support and system optimization to ensure stable day-to-day operations.

Jan 2020 **Freelancer**

- Established a POS system for **Saxon**, including database architecture, stock management, CRUD for customers, employee management, transactions, sales, barcode integration, receipt printing, and various reports like daily cashier and sales reports.
- Developed an AI chatbot that prompts users to upload a PDF and then answers diverse questions about its content. This solution integrates the **Yii2 PHP framework** with **Python's NLTK** for NLP, using **tokenization**, **Flask**, **pipeline automation**, Auto **Tokenizer**, and **AutoModelForQuestionAnswering** to ensure accurate and relevant responses.
- Built personal applications using **Flutter, Angular, Vue.js, React, React native, Redux, Firebase, Nodejs, Express, MongoDB**, and many more technologies.

EDUCATION

Jan 2019 – June 2022 **Bachelor of Science in Computer Science**
Lebanese International University, Lebanon

- GPA: **3.69**

KEY CERTIFICATION

June 2021 **Switching, Routing and Wireless Essentials**
Cisco Networking Academy

- Completed CCNAv7 certification requirements in Switching, Routing, and Wireless Essentials.

Dec 2020 **Fundamentals in Digital Marketing**
Maharat min Google, Balamand University

- Gained a solid understanding of key digital marketing concepts.
- Learned actionable strategies that I can apply in real-world scenarios.
- Connected with peers and industry professionals.
